

Amendments to the Specification:

Please replace the paragraph, beginning at page 9, paragraph number 44, with the following rewritten paragraph:

[0044] Although a single output port 308, ~~is shown in Figure 3,~~ may be used, numerous output ports, 308, 309 may be included in the set top box 306. For example, a distinct output port may be provided for each of a component video signal, an RGB video signal, a S-video signal, a composite video signal, and a modulated composite video signal. If an RGB output port is included, and a closed-caption signal is to be transmitted from the set top box 306 to the video recording device 312, the closed-caption signal may be included on each component of the RGB video signal, or solely on the green component of the RGB video signal.
